In a strategic move, PSA expands into Kazakhstan, extending the Group's digital and railway capabilities, to support trade along the Middle Corridor.

KPMC, our joint venture with Kazakhstan Temir Zholy (KTZ), is focused on advancing the Trans-Caspian International Transport Route (TITR), a key rail corridor linking China and Europe. KPMC plays a crucial role in supporting trade along the Middle Corridor by offering cargo owners an additional intermodal transport option to enhance the agility, resilience, and sustainability of their businesses via TITR. By identifying key nodes along the corridor for asset investments, to improve efficiency and ensure smoother trade flow.

Additionally, Global DTC (GDTC), in partnership with Pegasus Logistics, has streamlined trade and logistics processes through the DTC Platform - a global neutral multimodal platform connecting Asia and Europe across key transport corridors. The platform supports seamless transit trade through digital document flow, real-time cargo tracking, customs compliance solutions, and a marketplace connecting freight forwarders and shippers, further supporting PSA's commitment to facilitating international trade.
