SGP MULTIPURPOSE TERMINALS

SGP Multipurpose Terminals, a subsidiary of Saudi Global Ports Group (SGP), manages five multipurpose terminals in four ports, along the Eastern Coast of Saudi Arabia: King Abdulaziz Port Dammam (KAPD), Jubail Commercial Port (JCP), King Fahad Industrial Port Jubail (KFIP) and Ras Al-Khair Port (RAK). These multipurpose terminals, which function as an integrated entity, are equipped to handle high-demand industrial cargo efficiently, including project cargo, heavy lifts, bulk commodities, RoRo, and industrial shipments. They support national industries such as energy, petrochemicals, construction, and mining, and are key to the Kingdom's ongoing mega projects and economic development efforts.

SGP plans to invest more than SAR 700 million (~USD 187 million) in the multipurpose terminals to upgrade them and acquire new equipment.

SGP already manages container terminals at KAPD (SGP Container Terminals) and SGP Intermodal (operating the Riyadh Dry Port Ecosystem which includes the Riyadh Dry Port, Riyadh Empty Yard, and Dammam Empty Container Yard) and is developing the Dammam Integrated Logistics Zone (DILZ).

With this ecosystem in place SGP can offer comprehensive end-to-end supply chain solutions, spanning breakbulk, RoRo, container handling, rail, warehousing, and last-mile distribution.

SGP is a member of the PSA Group.
