EXOLGAN CONTAINER TERMINAL

TRANSPORTATION NETWORK

HARBOUR LAYOUT

Exolgan Container Terminal represents PSA International's first foray into South America. It provides a comprehensive suite of services to shippers and shipping lines, including bonded depot services, third party logistics and national distribution.

Located in Dock Sud - Buenos Aires, Exolgan is the leading terminal of the Port of Buenos Aires, positioned as the only terminal capable of attending to two Post-Panamax vessels simultaneously. The terminal is located eight kilometers from the Buenos Aires downtown, with uncongested access to major highways and rail links.

Exolgan Container Terminal, together with Exologística and Logistics Platform Investments (LPI), is part of PSA's International Trade Logistics group. Exologística is the leading logistics integrator, present in Argentina, Brazil and in Uruguay. It provides supply, warehousing, distribution centre operation, transport and distribution services at the national level, as well as "In House" logistics operations. It operates throughout the entire logistics chain, regardless of the type of cargo or its geographical location, providing tailor-made services and guaranteeing lasting competitive advantages. LPI is the largest developer in Argentina of specific infrastructure for logistics activities. ■
