PSA ANTWERP

TRANSPORTATION NETWORK

PSA Antwerp, PSA's largest investment outside Singapore, is the container gateway to Europe, with excellent transshipment and hinterland connections for rail, road, barge and short-sea vessels.

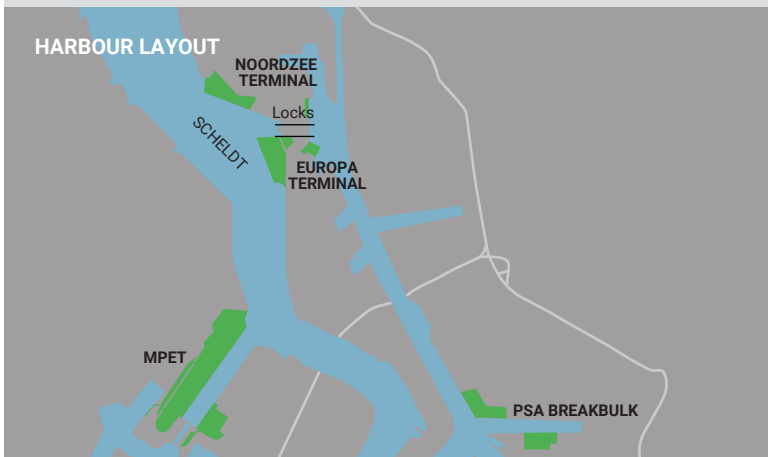

PSA Antwerp fully owns and operates two container terminals on the right bank of the river Scheldt: Noordzee Terminal and Europa Terminal. It also operates MSC PSA European Terminal (MPET) in a joint venture with Terminal Investment Limited on the left bank of the river Scheldt.

The Antwerp container terminals are connected to more than 800 destinations worldwide through 300 regular services. Together, they handle over 80% of containers that arrive in Antwerp.

MPET is a 9-MTEU facility, making it the largest container terminal in Europe.

Under 'Project Emerald', Europa Terminal is currently transforming into an automated, future-proof terminal, designed to handle the latest mega vessels and deliver greater capacity, safety, and sustainability. ■
