Strategically located in the cargo-rich hinterland of Bac Ninh Province, Tan Cang Que Vo Inland Container Depot (TCQV ICD) is an ideal cargo focal point for the consolidation and hubbing of containers in North Vietnam.

TCQV ICD's close proximity to factories and warehouses of major beneficial cargo owners presents an opportunity for PSA to enhance our overall service offerings through customised intermodal supply chain solutions.

Its location along the Duong River allows it to offer barging services to and from the main clusters of river and deep sea ports in Haiphong, providing an environmentally sustainable and cost effective mode of transportation.
