

NEWS RELEASE

25 June 2026, Italy

PSA INTERMODAL ITALY AND LOGTAINER SIGN AGREEMENT TO MANAGE PADOVA INTERMODAL TERMINAL AS PSA PADOVA

PSA Intermodal Italy, PSA Italy's intermodal operations arm, and Logtainer have signed the final agreement for the management of the intermodal terminal at Interporto Padova, marking the transition from the tender award obtained in December 2025. The agreement provides for the establishment of a new company, 'PSA Padova', which will lead the management and further development of the terminal.

PSA Padova aims to strengthen Padua's role as a strategic logistics hub within key European freight and intermodal corridors, in line with PSA's Node to Network (N2N) strategy, by enhancing connectivity between inland terminals, seaports and international transport networks, with an open and multi-user focus.

PSA Intermodal Italy will assume the principal role in PSA Padova, holding a majority stake and operational responsibility, building on PSA Italy's established presence in the country. Interporto Padova will remain as a shareholder, ensuring strong local anchoring and continued strategic alignment of the terminal within the regional logistics system. The project builds on PSA's global network of ports, inland terminals and supply chain solutions, bringing its integrated approach to inland logistics in Padua, together with the complementary expertise of Logtainer in multimodal transport operations in the Italian market.

Given the terminal's advanced infrastructure and established connections to the Trans-European Transport Networks, Padua will drive PSA Italy's ecosystem excellence, reinforcing the PSA Group's N2N strategy to enhance competitiveness, efficiency and sustainability for Italian companies and supply chains across Northeastern Italy. The integration of rail, road and port linkages, will enhance freight flows through Padua and contribute to more efficient and lower-emission inland logistics.

ABOUT PSA ITALY

PSA Italy operates in Genoa and Venice, at the port terminals of PSA Genova Pra', PSA SECH and PSA VENICE – Vecon. The company directly employs more than 1,000 people in Italy and handles over 2 million TEUs each year, representing 25% of Italy's containerized import and export traffic.

PSA Italy is part of PSA International (PSA), a market-leading port group and a trusted partner for operators across the maritime and logistics supply chain. The Group manages a portfolio of more than 70 maritime, rail and inland terminals across over 180 locations in 45 countries, as well as distriparks, warehouses, and maritime and digital services. Leveraging the expertise

and experience of a global and diverse team, PSA works closely with customers and partners to develop world-class port ecosystems and deliver innovative supply chain solutions, helping to accelerate the transition towards more sustainable trade.
